

## Part 2-9 → Drawing Graphs of Proportional Relationships

You like the flavor of chocolate milk made with 3 scoops of powder and 4 ounces of milk.

Complete the table  
Draw a graph

scoops	3	6	9
milk	4	8	12

$\frac{\text{scoop}}{\text{milk}} = \frac{3}{4} = \frac{12}{12}$   
 $3 \times 12 \div 4 = 9$

$\frac{\text{scoops}}{\text{milk}} = \frac{3}{4} = \frac{6}{x}$   
 $4 \times 6 \div 3 = 8$
